

ENTERPRISE & SECURITY ARCHITECTURE

Architecture Decision Sprint

Build a sound basis for a specific architecture decision.

You need to decide on a cloud, platform or integration approach. We compare the relevant options against your business objectives, security requirements and operational constraints.

CONSULTING EFFORT

3-5 consulting days

PLANNING WINDOW

over approximately 1-2 weeks

Non-binding planning range, including preparation and follow-up. Consulting effort is not the same as elapsed project time. Actual effort and scheduling depend on scope, documentation, access, stakeholder availability and capacity.

Your deliverables

- Assessed options with benefits, risks and dependencies.
- An outline target architecture and a documented recommendation to support your decision.
- Prioritised next steps for planning and implementation.

Who is it for?

For IT leaders, architecture owners and project teams in financial organisations and IT service providers.

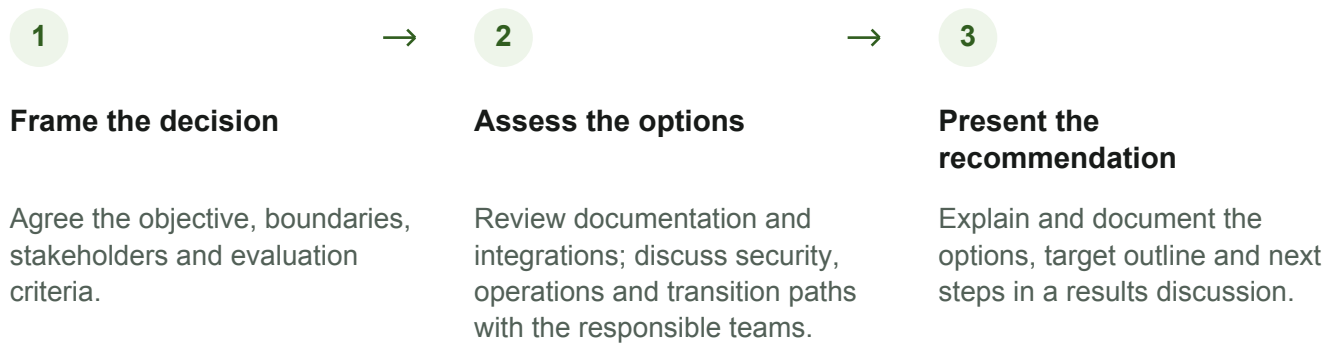

Price on request

You will receive a binding proposal after we agree the scope. Services, deliverables, fees and dates are agreed before the engagement begins.

SCOPE AND COLLABORATION

A clearly agreed scope

One bounded decision for a solution, platform or integration. The proposal defines the options, interviews and systems to be considered. IAM/PAM or logging can be agreed as a specialist focus.

What you provide

A specific decision to be made, existing architecture and integration documentation, and contacts from the business, IT, security and operations. Required materials and interviews are agreed in advance.

Location and arrangements

On site in Germany, Austria, Switzerland and the Netherlands. Remote work and travel and accommodation costs are agreed in the individual proposal.

A separate engagement

A separate engagement, not included in existing workshop or check fixed prices. Additional topics, appointments and revision rounds are agreed in advance.

What is not included

No complete enterprise architecture, product deployment or technical implementation. Your organisation retains responsibility for the decision and approval.

Discuss scope and timing
